## Learning Corner - Tree

The Tree Learning Corner is a sculptural, free-standing piece that provides a little nook in small or large expansive spaces. It offers a place to sit where a parent or caregiver can read a book or interact with the Learning Panels or other PLAY elements. Our Learning Panels are easy to swap out, allowing for a fresh and dynamic place to visit. This system can be configured for larger spaces too.

### Learning Corner - Tree Modifying

The Tree Learning Corner may be modified to meet the needs of many different settings. Pictured here, the interior design team at MSR Design and the Norman East Library wanted to modify our Tree Learning Corner to reflect the flora and fauna of the Oklahoma prairie as well as creating a pass thru tunnel for children to PLAY. The TMC design team illustrated all of the prairie content.

### **Sunflower Learning Corner**

Instead of a tree element, the Haymarket Gainesville Community Library wanted a sunflower to represent their more rural and agriculture community.
